

FOSP Lab Sheet

IV Semester

BE Computer

Labsheet#8

Objective

1. To learn form validation using JavaScript.
 2. To learn about basics of PHP.
-
1. Create HTML form with fields Full Name, Address, Telephone, Gender, Email, Country and Comments. Write JavaScript program to validate that form so that user will only write correct values. Check for empty values, number, & email and focus them on receiving invalid values.
 2. Write a client-side program to display the continuous Time in the status bar of the browser. Time should be updated every second.
 3. Demonstrate use of variable, constant, comment, branching in PHP.
 4. Demonstrate the ways of displaying data in PHP.
 5. Demonstrate how foreach is special from other type of loops.
